

EURYDICE NATIONAL UNIT IN UKRAINE: main activities and key development directions

Andrii Lytvynchuk

Head of the Eurydice National Unit in Ukraine,
Director of the SSI "Institute of Educational Analytics",
PhD in Economics, Senior Researcher

Eurydice National Unit in Ukraine –
SSI "Institute of Educational Analytics"

Co-funded by
the European Union

The **SSI "Institute of Educational Analytics"** is a leading state scientific institution in Ukraine specialising in the development of educational statistics and information analytics. The Institute is a relatively young organisation that was established in 2014. It has about 80 employees, including researchers with academic degrees, leading experts, analysts and an important part of the team are IT specialists.

The Institute operates under the **Ministry of Education and Science of Ukraine**. The main goal of the Institute is to provide reliable information and analytical support to the Ministry in the formation and implementation of state policy in the field of education.

- The Institute of Educational Analytics serves as the **information and analytical back office for the Ministry**, making effective use of modern IT tools and data science methods.
- It also provides technical administration for the national **education management information systems (EMIS)**, which are continuously scaled up and modernised with new applications.

Main information tools for education management used by the Institute of Educational Analytics, including those developed during the war

1. Official educational statistics (collection, verification, safe storage, distribution)

2. Verification and use of individual information about students and teachers for the needs of budget expenditures

3. Targeted surveys of the educational process participants to identify their urgent needs in extreme conditions (including in cooperation with foreign colleagues as UNICEF, World Bank, etc.)

4. Collection every 10 days of more than 100 indicators of administrative educational information from regions of Ukraine (Ministry dashboard)

5. Indicators based on operational data: a set of educational indicators important for management; risk-oriented visualization

through two national EMIS:

SHC "AICEM"

AS "IRC"

State Statistics:

<https://www.ukrstat.gov.ua/>

SSI "IEA":

<https://iea.gov.ua/>

creation of a secure database of individual data of teachers and students for more accurate distribution of budget educational subventions (data are used to model the distribution of educational subventions, which account for about a third of all education budget expenditures, especially given the circumstances of a 20% reduction in budget in 2022/2023 compared to the previous year).

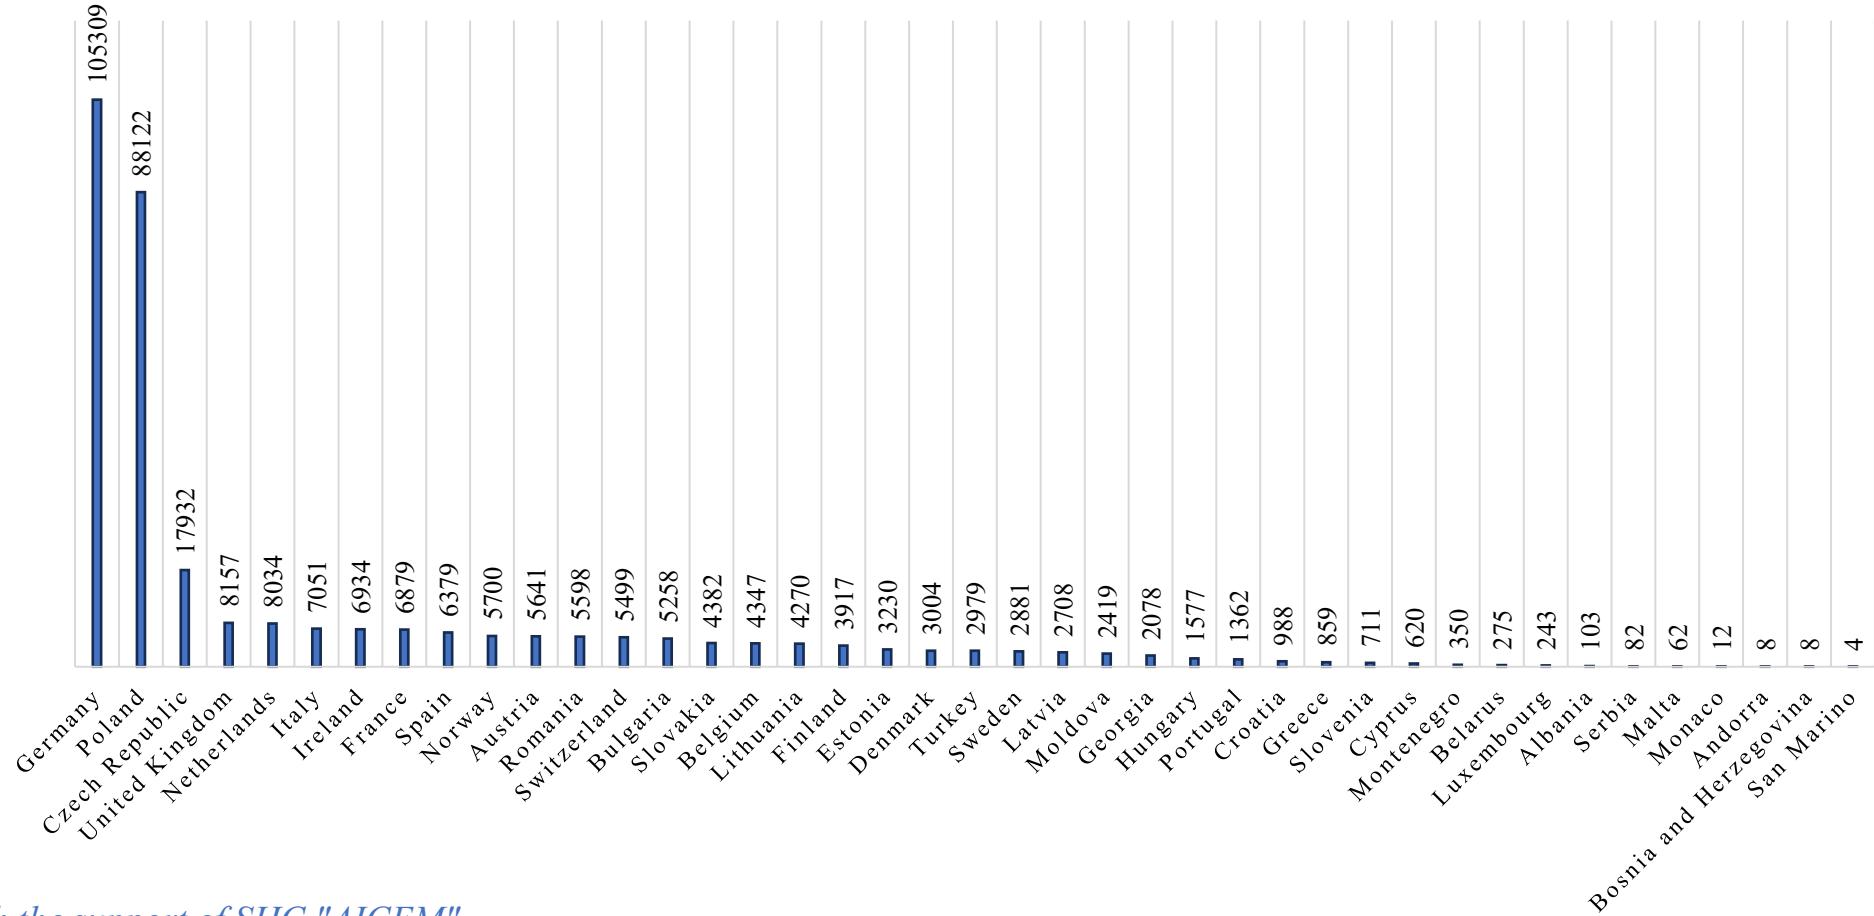

based on the results of these surveys, UNICEF financed \$80 for each of the IDP teachers and provided funds for laptops for them; 5 million computers with Microsoft licenses, 50 thousand Google licenses were distributed and administered to IDP teachers, etc.

during the war, administrative data is regularly collected from regional military-civil administrations, including from regions where hostilities take place, which allows for a prompt response to war-related educational problems.

Indicators based on operational data, created by the experts of the Institute of Educational Analytics together with the Ministry, are designed to present the key characteristics of the educational process both at the regional and national levels in the form of a thermal matrix in order to prioritize the areas of management efforts for the educational development.

Distribution of Ukrainian secondary school students forced to leave as a result of the full-scale war (as of January 2025)

**Data collected with the support of SHC "AICEM"*

Eurydice National Unit in Ukraine: Establishment and Projects

- On 15 June 2023, the **Ministry of Education and Science of Ukraine signed a framework agreement with the European Commission** on cooperation in the field of education, paving the way for closer alignment with the EU. This was an important step towards Ukraine's official accession to Eurydice Network in 2024.
- In 2024, the Network expanded to include three new countries – Ukraine, Georgia and Moldova. **In Ukraine, the SSI "Institute of Educational Analytics" was designated as the National Unit of the Eurydice Network** (Order of the Ministry of Education and Science No. 421 of 29.03.2024).
- **List of Projects:**
 - ***Eurydice Network in Ukraine: Access and Cooperation (ENUAC)***
Grant No. 101167055
Duration: 01.01.2024 – 31.03.2025
 - ***Eurydice Ukraine: Improving Education Accessibility (EU-IEA)***
Grant No. 101228855
Duration: 01.04.2025 – 31.03.2027

**Expansion of the Eurydice Network to include
Ukraine, Georgia and Moldova in 2024**

Implementation of the «Eurydice Ukraine: Improving Education Accessibility» Project (EU-IEA)

WP 1: Support for the Preparation of Eurydice Reports

- ❖ **1 Background Report** (Feasibility study for mobility scoreboard);
- ❖ **4 Thematic Reports** (Well-being at school, Teachers and school leaders, Mobility scoreboard, Placeholder);
- ❖ **5 Facts and Figures Publications** (School calendars, Organisation of the academic year in Europe, Teachers' and school heads' salaries and allowances, etc.);
- ❖ **System-level indicators;**
- ❖ **Diagrams** on educational structures and compulsory education.

WP 2: National Description of Education System

- ❖ Preparation of materials for the **national education system description for the Eurypedia section**;
 - ❖ Biennial update of **Chapter 14** (Ongoing reforms and policy developments) and **Subchapter 6.6** (The organisation of the academic year) by 15 September and 31 March;
 - ❖ Annual update of at least **10 sub-headings** of the national description by 31 March.

WP 3: Promotional Activities

- ❖  **Organisation** of three **communication events** (2 conferences & 1 workshop);
- ❖  Preparation of publications: **Country news** for the EACEA website;
- ❖  **Website** maintenance: Regular updates and content management
- ❖  **Creation of photo/video content**: Event recordings, presentations, conference materials, etc.

Eurydice Network was established in 1980 by the European Commission and its member states to support cooperation in the field of education in Europe. The main goal of the Network is to provide a detailed understanding of the organization of education systems in Europe and their functioning. With the accession of Ukraine, Moldova, and Georgia in January 2024, the Network has expanded and now comprises 43 units. The State Scientific Institution "Institute of Educational Analytics" (SSI "IEA") is the official national unit of the Eurydice Network in Ukraine.

Ukraine's country news published on the Eurydice 'News & Articles' webpage (2024)

Ukraine: Advancing the reform of specialised secondary education

The reform of specialised secondary education is part of the comprehensive renewal of general secondary education envisaged by the "New Ukrainian School" concept. Starting in 2023/2024, this reform is to be completed over a decade, with the final phase expected between 2029 and 2033.

Ukraine: Transforming the preschool education system

In implementing the state policy on preschool education in Ukraine, educational policymakers focus on creating a modern, high-quality, accessible, and inclusive learning environment that aligns with needs of children and society as a whole.

Ukraine: Reforming vocational education as a cornerstone for national development and recovery

As the world is becoming increasingly innovative and technologically advanced, rapid adaptation to new challenges is essential. Vocational education and training (VET) plays a pivotal role in this process by developing the country's social capital and preparing a skilled workforce to meet the demands of the modern economy.

Ukraine: Reform of general secondary education – the New Ukrainian School (NUS)

The NUS reform is a landmark initiative aimed at transforming general secondary education in Ukraine. Drawing on global best practices, the reform aims to modernise the education system, making it contemporary, inclusive and accessible. Its primary goal is to equip pupils with the skills and competences needed to meet the challenges of the 21st century.

Ukraine's country news published on the Eurydice 'News & Articles' webpage (2025)

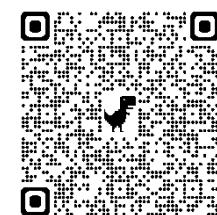

Ukraine: Digital transformation of education as a strategic path to resilience and innovation

The digitalisation of education is a strategic priority for Ukraine, ensuring accessibility and innovation while addressing challenges exacerbated by the war. As part of a global trend driving sustainable development, it aligns with Ukraine's European integration pathway and is synchronised with the Digital Education Action Plan (2021-2027).

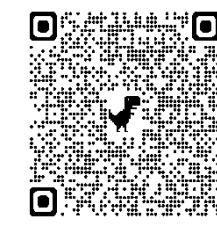

Ukraine: Recognition of schoolchildren's learning outcomes acquired abroad is now regulated

In June 2025, the Cabinet of Ministers of Ukraine adopted a resolution approving the procedure for recognising the learning outcomes of schoolchildren who have received formal and/or non-formal education from providers located abroad. Based on legislative amendments adopted in February 2025, this document establishes such an official specific recognition mechanism for the first time.

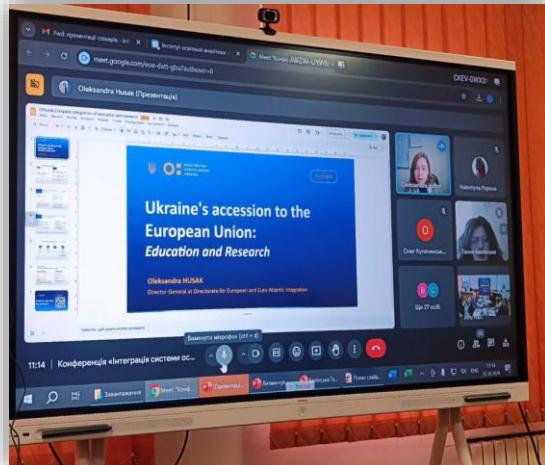

Ukraine: National educational platform supports reintegration and training of veterans

As a result of Russia's full-scale war against Ukraine, a substantial portion of the working-age population has been mobilised into the Armed Forces. The transition of service members back into civilian life requires comprehensive state support, particularly in the field of education. To support this transition, it is crucial to develop tools that offer opportunities for acquiring new knowledge, retraining and career development.

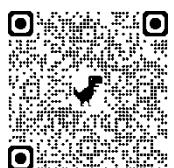

Four communication events implemented under the ENUAC and EU-IEA projects

- ❖ Workshop: "Eurointegration of Ukrainian education" (7/06/2024)
- ❖ International scientific and practical conference: "Integration of the Ukrainian education system into the European Education Area" (25/10/2024)
- ❖ Workshop: "Internationalisation and educational reforms: the path to European integration" (28/03/2025)
- ❖ International scientific and practical conference: "Harmonisation of the Ukrainian education system with the European Education Area: achievements, challenges and prospects" (30/10/2025)

Following the conferences,
two Collections of
participants' abstracts were
prepared

Eurydice Talk: Eurydice Network welcomes Ukraine, Georgia and Moldova, March 21, 2024

On March 21, 2024, the Eurydice Network Facebook page (EurydiceEU) hosted an online event called **Eurydice Talk**. The event was dedicated to this year's expansion of the Network to include Ukraine, Georgia, and Moldova.

Representatives from the newcomers' National Units had an excellent opportunity to share their experiences and discuss further cooperation. The focus was on fostering a more robust, inclusive, and innovative educational landscape. The Eurydice Talk also covered priority directions for the development of educational policy in the participating countries.

Annual Meetings of the Heads of Eurydice National Units

Lisbon, Portugal, October 10-11, 2024

Brussels, Belgium, October 13-14, 2025

Eurydice National Unit in Ukraine –
SSI "Institute of Educational Analytics"

Co-funded by
the European Union

Ukraine's membership in the Eurydice Network paves the way for extensive integration of Ukrainian education into the European educational space and enhanced cooperation with the European community. The [expected results](#) include:

- In the **short term**, information on the Ukrainian education system will be prepared in accordance with EU standards and made available to a wide range of Ukrainian and international audiences

- In the **medium term**, an increase in cooperation between the Ukrainian National Unit and key stakeholders in the national and European educational space is anticipated

- In the **long term**, a mechanism for sharing best practices and conducting joint research to improve the quality of the education system and implement evidence-based policy reforms will be introduced.

Opportunities for collaboration: Publication in the «Educational Analytics of Ukraine» journal*
